Question:

1. Special Clauses Section 01060, Paragraph 1.3 "Contractor's Mobilization Area" states,

"The Contractor will be permitted to use an area [approved] [designated] by the Contracting Officer within the contract limits for operation of his construction equipment and plants, shops, warehouses, and offices."

We have recently been told that contractor's will NOT be allowed to build their mancamps within the Kandahar base's perimeter which means there will be a huge increase in costs, by renting land outside the base, having it de-mined, an entirely different security approach to include 360 degree perimeter security with HESCO walls, armed guards, etc.

Can the Government please confirm to all bidder's if we should assume we will be able to build a mancamp within the base or if we should include costs for setting up our facilities outside the base.

Answer? Area C, see attached, will be provided by the United States Afghanistan Engineer District for use by the awardee/contract holder for construction equipment, plants, shops, warehouses, offices and a mancamp.

Question

Ref: 4.2 Wadi Diversion and Mitigation, please clarify the length of wadi diversion and mitigation. What is the cross section detail of new wadi?

Answer

Field verification of site conditions is the responsibility of the perspective bidder. There is no "new wadi" identified in the amended RFI.

Question

Is it acceptable to construct the interior partition walls of building without reinforcement ?

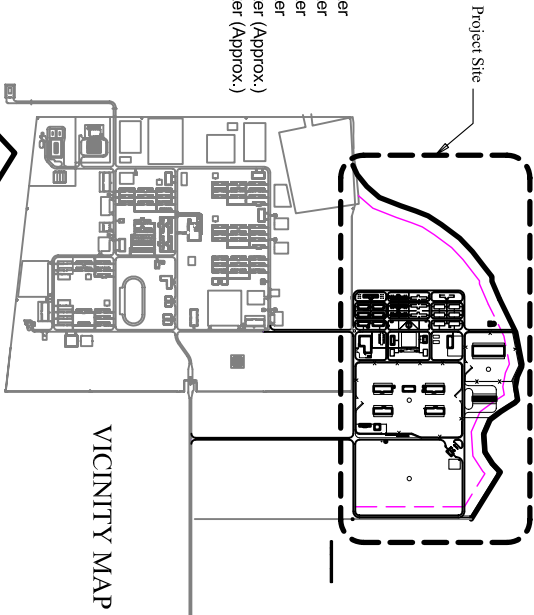

Answer

All construction must be in accordance with applicable contract referenced design requirements.
